[REDACTED] Pine Ct

Overlooking the Dog Park

Built the house in 1999.

So. Been asking please to come up with a solution to very very very early barking dogs. There must be a way to have hours rather than sun up sun down. Many times it's been 6:45 am

Sometimes 7:15 pm. Folks just don't let their dogs poop and pee.

It's a stream of continuous, barking, barking, barking, barking, barking, barking.

I work. I'm 80. I'm woken up with

Barking barking, barking, barking, barking. At 6:30 .

The state of California has parks that open at eight and close at dusk.

You're getting a bathroom put it down there. If it's not locked up, people are going to sleep in there the person that locks it up at night and opens it in the morning could open a lock on the gate of the dog park possibly.

It's an echo chamber down there I can hear everybody's conversation.

I have double pane glass, and I can still hear the barking barking barking.

You've heard me complaining about this for two years now isn't there something somebody can do?

I live by rules why can't the dog park live by some sort of rules in order to not wake up the entire neighborhood.

Thank you

Laylon and John Whittaker

Written Public Comment:	Regarding Agenda Item 4F - great news on the CalRecycle \$20,000 grant funding available to us for an Education campaign. Several questions please on the campaign: 1) Who is the Science Discovery Team? I didn't see anything in the documents about them. 2) It looks like this is solely related to organic materials.. is this true or does the Education campaign also address

	recyclable and landfill materials? 3) What are the specific objectives of the Education campaign and will it include commercial as well as residential users? Thank you, great to see this happening!! Jeff

Thank you for this presentation. It will be unfamiliar to the community if we ever have to evacuate. Can we hold a practice evacuation drill to allow us to learn and identify problems before we have to evacuate for real? Thank you.
