The draft Resolution 32-2026 before you today is lacking information about what Board action is needed in subsequent years to authorize the District to abate hazardous weeds and rubbish on private property at the owner's expense.

All the current actions, with the exception of the "formal" public hearing, should be taken. The annual updated list of non-compliant parcels should be made public. A description of the steps the District plans to take should be made public. The intent to mail Code 14900.6 postcards to non-compliant property owners, the intent to employ District weed abatement contractors, and the billing procedures should be made public.

We recommend adding this missing information to the draft resolution to avoid giving the impression that future actions are being taken against property owners without the knowledge of the Board or the public.

Thank you for your consideration on this matter.
