Written Public Comment:	<p>Will the CSD P-L-E-A-S-E find the wherewithal to properly pave the Rodeo Grounds Road? During the dry season, the road is a rutted dustbowl. During every winter storm, large amounts of material are eroded off the roadbed and flow into Santa Rosa Creek, further silting it up and endangering what little salmon traffic make their way up the creek to spawn. Additionally, large amounts of dirt wind up on the Burton Drive bridge, creating a driving hazard from the slick nature of the material and the berms that result from traffic packing the dirt down. Furthermore, this situation does not present Cambria in it's best light to all the tourist traffic driving on Burton. Properly paving the road and providing well-designed runoff areas for any silted material will be a win-win-win, for Cambria citizens, visitors and salmon. Thank you!</p>
