Storm Warning—Road Closure Updates

Cambria—Windsor Blvd, the entrance to Park Hill in Cambria, has been reopened and traffic is being allowed through. Emergency personnel in conjunction with San Luis Obispo County Roads are keeping a close watch on the Santa Rosa Creek water level, and are prepared to reclose the road if the bridge is compromised again.

The Emergency Access Road across the ranch has been closed and secured, and will not be accessible due to the opening of Windsor Blvd.

Burton Drive is closed between Eton Road and Patterson Place due to down trees and power lines.

Please remember that the safest course of action during the remainder of this storm is to shelter-in-place. We are still expecting significant winds and rain that can be expected to cause poor road conditions, flooding, fallen trees and downed power lines. If you witness one or more of these hazards please notify emergency services by calling 911.
